Gary,
Actually, they are all very good comments, but some need to wait until we get into the remedial design. CAS

Gary,
I reviewed the comments and most are very good comments.
However, there are some that are asking for information that is clearly a remedial design item (equipment type), and there is one or two that are also borderline RD items.
I am getting ready to go to a meeting. We can discuss tomorrow or Monday morning. CAS

Gary,

I want to take a close look at the comments. I should be finished by tomorrow.

I quick item I noted was that the comments are for the draft FS and in the letter we are telling the PRPs to incorporate the comments in the Final Remedial Investigation Report.

I believe we should say in the Final Feasibility Study Report. CAS

Carlos,

The draft comments on the San Jacinto FS Report are attached. Please let me know if you have any questions/issues, or if not, I will route to Steph to final & send out.

Thanks,
